

Product Card METALLIFEROUS MINING SEARCH

KEY BENEFITS

Highest level research
and expert interpretation

- ✓ 'Easy Answer' report format designed for conveyance
- ✓ 24hr service available
- ✓ Fully interpreted Professional Opinion
- ✓ Site-specific result; no unnecessary buffers applied.
- ✓ Front page summary with plan tells whole story
- ✓ Accurate site specific appraisal using our unique SecureShaft (trademarked) dataset, saving clients time and money

RESOURCES AND PROCESS

We consult our vast mining archive using our purpose-built digital mapping environment as well as our unique and dynamic dataset SecureShaft (trademarked) to provide the most comprehensive, accurate and site specific results.

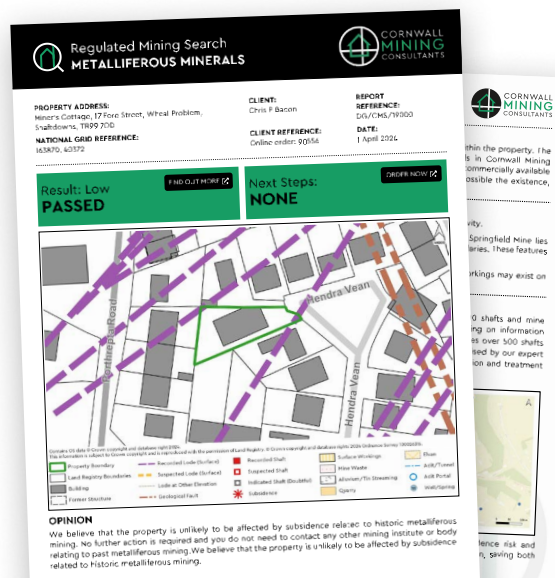

We use:

- Factual information from maps, plans and records in the Cornwall Mining Consultants private archive
- The results of our 5000 on-site investigations;
- Commercially available datasets.
- Our in-house exclusive SecureShaft (trademarked) dataset

Data from this unique combination of specialist resources is then interpreted by our in-house expert research team to predict where further undocumented mine workings lie and the threat they pose. Additionally, our SecureShaft (trademarked) dataset further enables us to clear properties without costly intrusive investigation work, saving on both time and money.

COVERAGE

Applicable throughout the historic metal mining region of South West England (Cornwall; Devon and Somerset).

Hazards Identified:

- Shafts
- Underground workings
- Extractive surface workings
- Mine waste tips
- Mine drainage tunnels
- Trial workings
- Predictable unrecorded workings
- Mineral deposits
- Tin Streaming

The search report also highlights:

- Wells
- Quarries/Pits
- Mine/Quarry waste (non-metals)
- Mine/quarry drainage tunnels
- Non-metal trial workings
- Current and future metalliferous mining

REGULATED HIGH STANDARDS

Well established Search Code compliant in house QA.
Every mining search report is completed in accordance with our in house protocol and peer reviewed before issue.
